

## PROFESSIONAL IN-BUILDING COVERAGE SOLUTIONS

### COMPLETE SYSTEM DESIGN AND SERVICE • LOWER COST

Business sounds great when phones are ringing and data is humming. But when plagued with dropped signal and lost service, the sound of frustrated customers, tenants and employees—or worse, silence—is anything but pleasing to your ears, or your bottom line. **Powerful Signal** designs cellular amplifier systems that eliminate cell signal dead zones and weak spots, restoring harmony to your profitability.

We combine expert knowledge with the highest-quality, FCC approved cellular repeater products to fit the most demanding commercial applications. From home office to sprawling warehouse complex, from high rise office tower to medical center campuses, **Powerful Signal** ensures you have the required cell signal strength wherever and whenever you need it in your building.

**Powerful Signal** has created the **ProWay** solution by providing consulting, system design, nationwide installation, and lifetime support to meet the needs of companies, small and large, and their demands for strong voice and data signal in their buildings.

Work with a proven, experienced company with a complete offering of products and services guaranteed to give you the results your need and expect.
